Keep it Simple!

## BreezeMAX Indoor Self-Install CPE

All-in-One – Just open the box and plug it in...

The **BreezeMAX Si** is a compact, portable, single box device that is deployed indoors, typically near the end user's PC. It is designed for plug and play operation, enabled either via a SIM card or by using a user-friendly application provided on a CD with the unit.

The BreezeMAX self-install CPE supports intelligent antenna steering functionality using six antenna elements with 9dBi gain. Services and interfaces supported include 10/100 Base-T for IP data, 802.11b/g for WiFi hotspots, 1 or 2 POTS (RJ11) ports for voice services and battery back up.
